SHORTHORNS

STUNKEL SHORTHORNS

E.L. STUNKEL 1885 - 1951

In 1900, Henry Stunkel, purchased his first registered Shorthorns from Novinger & Cain of Missouri. The lot consisted of 15 cows with some infusion of Scotch blood. Two cows were secured soon afterward from Joseph & H.C. Duncan. From this foundation stock was built one of the largest and oldest herds in the state of Kansas.

A son, Ed Stunkel, beginning at the age of 15 for fifty years devoted his life to producing and improving Shorthorns. He bred Shorthorns because outside of his family, they were his first love.

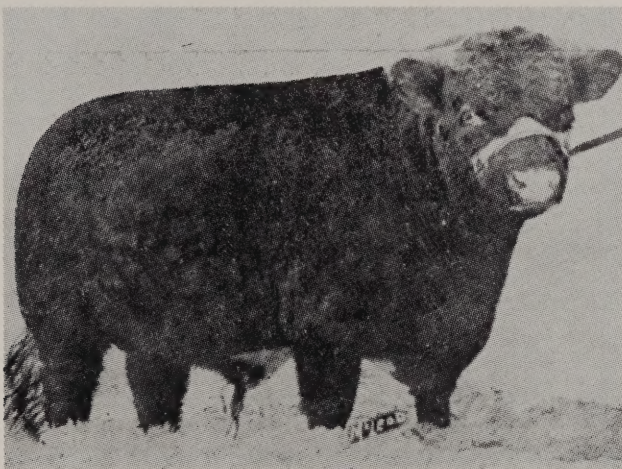

Other breeders were his fellow laborers and he appreciated their contribution to improving the Shorthorn breed. They in turn appreciated his contribution.

Since the time of his death in 1951, his wife, daughter and son have continued to manifest the same devotion in preserving the high ideals of their husband and father, which will be indicated in the quality of the present herd.

Ed expressed concern before his death to his children that they continue to produce and improve Shorthorns. As this is being done it is hoped that five granddaughters representing the fourth generation may have the same privilege for years to come.

A BLOCK OF FLESH

Under the heading, "A beef cattle specialist practices his preaching". The American "Shorthorn World" published this picture of Cromleybank Legionnaire. This bull is herd sire at Clem Larson's Claymore, Callender, Iowa. Legionnaire is by Kirkton Challenger, and his dam Aikbank Nonpareil is by Uppermill Augustus. The "Shorthorn World" comments: -"A block of natural flesh, this is the kind sought by Cruickshank and all improvers of beef cattle who have followed the sage of Sittyton. The law of breeding that 'thick-fleshed cattle produce thick-fleshed cattle' has not been changed by any intervening discoveries in the science of animal production since the principle was promulgated by early practical producers of beef seedstock. There has been improvement in quality, the ends are smoother, the middle and scale as satisfactory. Shorthorns of this type are still the leading improvers of commercial beef herds, the most valuable for crossing with other breeds."

TAKEN FROM SCOTCH SHORTHORN RECORD, DECEMBER 1953.
